EUROPEAN JOURNAL OF OPERATIONAL RESEARCH

Feature Clusters:

Heuristic and Stochastic Methods in Optimization
Guest Editors: L. Sakalauskas and J. Krarup

New Opportunities for Operations Research
Guest Editors: G. Wäscher, E. Akcali, I. Or, S. Özekici and C. Strauss

Editorial Board
Sven Axéll, Lund University, Lund, Sweden
Egon Balas, Carnegie Mellon University, Pittsburgh, USA
Jean-Pierre Brans, Free University of Brussels, Brussels, Belgium
Cathal M. Brugha, University College Dublin, Dublin, Ireland
Derek Brunn, London Business School, London, UK
Rainer Burkard, Technical University of Graz, Graz, Austria
Jacques Carlier, Université de Technologie de Compiegne, Compiegne, France
William W. Cooper, The University of Texas at Austin, Austin, USA
Dominique de Werra, Ecole Polytechnique Fédérale de Lausanne, Lausanne, Switzerland
Laureano F. Escudero, University Miguel Hernández, Elche, Spain
János Fodor, Budapest Tech, Budapest, Hungary
Masao Fukushina, Kyoto University, Kyoto, Japan
Raimo Hämäläinen, Helsinki University of Technology, Helsinki, Finland
Pierre Hansen, Ecole des Hautes Etudes Commerciales, Montreal, Canada
Toshihiko Ibaraki, Kwansei Gakuin University, 2-1 Gakuen Sanda, Japan
Jack P. C. Kleijn, Catholic University of Brabant, Tilburg, Netherlands
Mikhail I. Kovalyov, Belarus State University, Minsk, Belarus
Benedetto Matarazzo, University of Catania, Catania, Italy
Katsuhisa Ohno, Aichi Institute of Technology, Toyota, Japan
Vangelis Th. Paschos, University of Paris Dauphine, Paris, France
Erwin Pesch, University Siegen, Siegen, Germany
Gerard Plateau, University of Paris 13, Paris, France
Bernard Roy, University of Paris Dauphine, France
Bhaba R. Sarker, Louisiana State University, Baton Rouge, LA, USA
Yannis Siokos, University of Piraeus, Piraeus, Greece
Eric Tallard, University of Applied Sciences of Western Switzerland, Yverdon, Switzerland
Tamás Terlaky, McMaster University, Hamilton, Canada
Emmanuel Thanasoulis, Aston University, Birmingham, UK
Lyn Thomas, University of Southampton, Southampton, UK
Paolo Toth, University of Bologna, Bologna, Italy
Paul van Beek, Wageningen University, Wageningen, Netherlands
Luis Nunes Vicente, University of Coimbra, Coimbra, Portugal
Jyrki Wallenius, Helsinki School of Economics, Helsinki, Finland
Gerhard Wäscher, Otto-von-Guericke University, Magdeburg, Germany
Jan Weglarz, Poznań University of Technology, Poznań, Poland
Laurence Welsey, Catholic University of Louvain, Louvain-la-Neuve, Belgium
Uri Yechiali, Tel Aviv University, Tel Aviv, Israel

Editorial Policy
Operational Research (OR) involves the application of scientific methods to the management of complex systems, including machinery, materials, money and information. It seeks to produce an understanding of managerial problems and to develop models which will enable the consequences of decisions to be investigated. OR methods have already had widespread application and success in many areas of business, industry and government, and their use is rapidly increasing in social systems and in the international arena. The European Journal of Operational Research (EJOR) is intended to strengthen these advances by publishing high-quality, original papers that contribute to the practice of decision making, within and beyond Europe, irrespective of whether their content describes an application or a theoretical development. A special call is made for case study papers showing OR in action in firms and other organizations. Mathematical or computer-science contributions should be capable of being used in the foreseeable future.

EJOR has regular and feature articles. Almost all articles contain a leading invited review explaining the developments in an OR topic over the past five years to the general OR reader. In addition to the other five types of contribution described in the Instructions to Authors at the end of this issue, EJOR includes OR software news (including ORSEP) and reviews of books published recently. For further information, see the Instructions to Authors at the end of each issue. Authors of contributions are asked to read these Instructions before sending four copies to any of the editors at the address above.

CONTENTS

Feature Cluster: Heuristic and Stochastic Methods in Optimization

723 Editorial: Heuristic and stochastic methods in optimization
   L. Sakalauskas and J. Krapu

725 Lower bounds and heuristic algorithms for the k-partitioning problem
   M. Dell’Amico, M. Iori, S. Martello and M. Monaci

743 An optimization algorithm for the clearing of interbank payments
   Y.M. Shafransky and A.A. Doudkin

750 A unified heuristic for a large class of Vehicle Routing Problems with Backhauls
   S. Ropke and D. Pisinger

776 Minimizing fleet operating costs for a container transportation company
   L. Costovich, R. Pesenti and W. Ukovich

787 A heuristic approach for combined equipment-planning and routing in multi-layer SDH/WDM networks
   H. Höller and S. Voß

797 Routing and wavelength assignment by partition colouring
   T.F. Noronha and C.C. Ribeiro

811 Solving Irregular Strip Packing problems by hybridising simulated annealing and linear programming
   A.M. Gomes and J.F. Oliveira

830 Pareto ant colony optimization with ILP preprocessing in multiobjective project portfolio selection

842 Using simulated annealing to optimize the feature selection problem in marketing applications
   R. Meiri and J. Zahavi

859 Heuristic approach for minimizing the projection error in the integrated mapping
   G. Dzemyda and O. Kurasova

879 A heuristic procedure for stochastic integer programs with complete recourse
   G. Lulli and S. Sen

Feature Cluster: New Opportunities for Operations Research

   G. Wäscher

EURO Gold Medal Award 2003

894 On the Hungarian inventory control model
   A. Prékopa

Management Science Strategic Innovation Price 2003

915 The valuation of options on capacity with cost and demand uncertainty
   S. Spinler and A. Huchzermeier

Excellence in Practice Award 2003

935 MABS: Spreadsheet-based decision support for precision marketing
   B. De Reyck and Z. Degraeve

Continued on last page of this issue
Instructions for Authors

For the submission of papers to the European Journal of Operational Research please consult the Guide for Authors at http://authors.elsevier.com/gfa/ejor.

Contents continued from the outside backcover

Excellence in Practice Award 2003 (Continued)
951 ARMS: An automated resource management system for British Telecommunications plc
   C. Voudouris, G. Owusu, R. Dome, C. Ladde and B. Virganas
962 LAPS Care—an operational system for staff planning of home care
   P. Eveborn, P. Fillsberg and M. Rönnqvist

Finance and Accounting
977 Bayesian portfolio selection with multi-variate random variance models
   R. Soyer and K. Tanjiri
991 Implicit–explicit Runge–Kutta methods for financial derivatives pricing models
   J. de Frutos
1005 Bid calculation for construction projects: Regulations and incentive effects of unit price contracts
   H. Missbauer and W. Hauber

Production, Logistics, Supply Chain Management
1020 Integrated technique assessment based on the pinch analysis approach for the design of production networks
   J. Geldermann, M. Treitz and O. Rentz
1033 Modeling reverse logistic tasks within closed-loop supply chains: An example from the automotive industry
   F. Schultmann, M. Zumkeller and O. Rentz
1051 Hybrid genetic approach for solving large-scale capacitated cell formation problems with multiple routings
   A.L. Nsakanda, M. Diaby and W.L. Price
1071 Multi-item spare parts systems with lateral transshipments and waiting time constraints
   H. Wong, G.J. van Houtum, D. Cattrysse and D. van Oudheusden
1094 A comparison of outbound dispatch policies for integrated inventory and transportation decisions
   S. Çetinkaya, F. Mutlu and C.-Y. Lee

Natural Resource and Energy
1113 Non-convex power plant modelling in energy optimisation
   S. Makkonen and R. Lahdelma
1127 Interior point models for power system stability problems
   W. Rosehart, C. Roman and L. Behjat
1139 Optimization of a large-scale water reservoir network by stochastic dynamic programming with efficient state space discretization
   C. Cervellera, V.C.P. Chen and A. Wen

Airlines
1152 Check-in computation and optimization by simulation and IP in combination
   N.M. van Dijk and E. van der Sluis
1169 A partially integrated airline crew scheduling approach with time-dependent crew capacities and multiple home bases
   Y. Guo, T. Mellouli, L. Suhl and M.P. Thiel
